Building

Located at number 46th of Gran Via Street, this building created by Pedro Muguruza had the honour of being one of the tallest buildings in Madrid until the Telefonica building was built. Along with this one, it is the local emblem of the American Functional Architecture of skyscrapers and the first of those built in bricks in this Street.

Space

On the 16th floor is Innédito16, a unique space divided into three highly versatile areas. An exclusive penthouse, the only one in this building, converted into a space for events.

Innédito16 has 138 square meters distributed in different environments and is distinguished by its large and characteristic windows that offer 360-degree views of the capital. Its white walls reflect natural light, a light that makes it one of the most special penthouses in Madrid.

Us

We organize all type of events and corporate shares, adapting the space to our customers' needs and desires in their proposals.

We offer premium advise too, including a complete support throughout the development and execution of the events.
